PROFESSIONAL SUMMARY

Backend-focused Software Engineer with 6+ years of professional and freelance experience building web, backend, and mobile applications. Experienced in developing APIs and data-driven services using Go (Golang), PostgreSQL, Elasticsearch, Redis, RabbitMQ, and Laravel, complemented by full-stack experience with React.js, Next.js, and Node.js. Experienced across automotive platforms, pricing systems, and end-to-end business applications in product engineering, freelance, and international agency environments.

TECHNICAL SKILLS

Languages: Go (Golang), PHP, JavaScript, Java
Backend: Echo, Laravel, Node.js, Express.js, REST APIs
Frontend: React.js, Next.js, HTML5, CSS
Databases & Search: PostgreSQL, MySQL, Elasticsearch
Caching & Messaging: Redis, RabbitMQ
Other: Android Development, Google Web Designer

PROFESSIONAL EXPERIENCE

Software Engineer

November 2022 – Present

PT Tiga Daya Digital Indonesia

- Develop and maintain backend services for a used-car marketplace, building RESTful APIs with Go (Echo) and PostgreSQL to support core platform functionality and business workflows.
- Implemented Elasticsearch to power vehicle search and data retrieval across marketplace inventory.
- Utilize Redis for performance-sensitive features and RabbitMQ for asynchronous processing and inter-service communication.
- Develop and maintain administrative backend services using Laravel, supporting internal operations and marketplace management workflows.
- Contribute to a vehicle Price Engine by developing APIs that aggregate and process automotive market data using PostgreSQL and Elasticsearch.
- Implement statistical pricing logic—including mean, median, mode, and other pricing indicators—to derive representative market prices from available vehicle data.
- Contribute beyond backend responsibilities by developing and maintaining frontend features using React.js with Next.js, supporting end-to-end product delivery.

Technologies: Go, Echo, PostgreSQL, Elasticsearch, Redis, RabbitMQ, Laravel, PHP, React.js, Next.js

Software Engineer

August 2021 – October 2022

Dentsu Creative — Singapore (Remote)

- Developed the frontend of an analytics platform for Meta advertising campaigns using React.js with Next.js, transforming campaign and advertising data into interfaces for performance analysis.
- Designed and developed an internal campaign web application using Vue.js with Nuxt.js for the frontend and Node.js with Express.js for the backend.
- Produced interactive HTML5 advertising banners using Google Web Designer for global clients, including Manulife and American Express.
- Developed a web experience for Toyota Gazoo Racing using React.js with Next.js, supporting Toyota's event-related digital campaign.

Selected Clients: Meta (Facebook), Toyota, Manulife, American Express

Technologies: React.js, Next.js, Vue.js, Nuxt.js, Node.js, Express.js, HTML5, CSS, JavaScript, Google Web Designer

Junior Software Engineer

December 2018 – January 2020

Smart Integrated System

- Developed web applications for multiple client projects using CodeIgniter 3 and Laravel, implementing features based on business and functional requirements.
- Contributed to Android application development using Java, working across both web and mobile software projects.
- Participated in application planning and requirements discussions, helping translate client needs into practical technical solutions.

Technologies: PHP, CodeIgniter 3, Laravel, Java, Android

FREELANCE PROJECTS

Inventory Management System

March 2023 – June 2023

PT Trijaya Aksesoris Garmen | Freelance Software Engineer

- Designed and developed a web-based inventory management system from the ground up, owning the development lifecycle from requirements analysis and system design through implementation and delivery.
- Built centralized workflows for inventory, incoming and outgoing stock movements, suppliers, and customers using Laravel and MySQL.
- Developed operational reporting and report-printing functionality to support inventory monitoring and business record keeping.

Technologies: Laravel, PHP, MySQL

Dental Clinic Management & Patient Mobile Application

April 2022 – June 2022

Mozza Dental Clinic | Freelance Software Engineer

- Designed and developed an integrated clinic management ecosystem from the ground up, consisting of an Android patient application, web-based clinic management system, and backend APIs.
- Owned the end-to-end development lifecycle, from requirements analysis and system design through implementation and final delivery.
- Developed an Android patient application using Java and a clinic management system using Laravel and MySQL, covering appointments, medical records, doctors, schedules, queues, and operational workflows.
- Designed and developed REST APIs connecting the Android application with the clinic management system and implemented real-time queue tracking and notifications using Pusher.
- Developed an in-clinic real-time queue display with Text-to-Speech (TTS) announcements for the currently served queue number.

Technologies: Java, Android, Laravel, PHP, MySQL, Pusher, REST API

EDUCATION

Bachelor of Computer Science (S.Kom.) — Informatics Engineering Universitas Multi Data Palembang

September 2018 – May 2022

GPA: 3.76 / 4.00

LANGUAGES

Indonesian: Native

English: Professional Working Proficiency
